

# The Stack Overflow Developer Survey 2019

## Data Analysis Report Presentation

Şeyda Neşe ATTARIAN

19.12.2020

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

This presentation provides an overview of the collected data including trends of programming languages, databases and web frames.

You will find the current and future trends.

Additionally, gender, age, country and education level comparisons will be mentioned.

# METHODOLOGY

---

For this report

- Data collected and analyzed on Current vs. Future Technology Usage on
  - Databases
  - Programming Languages
  - Frames
- Data collected and analyzed on
  - Gender
  - Age
  - Educational Level

# RESULTS?

---

- Trend Analysis
- Horizontal and Vertical Analysis
- Graphical Display
- Ratios of Man and Woman Respondents
- Descriptive Statistics such as counts of Specific Values

# INTRODUCTION

---

- This report is about comparisons about
  - A) current and future
    - Databases
    - Programming Languages
    - Frames
  - B) Demographics like
    - Gender
    - Age
    - Educational Level
- This report is for everybody who is curious about Data Analysis and being a data analyst
- At the end you will gain knowledge about past usages and future trends to choose and shape your future

# Top 5 Programming Language Trends

## CURRENT

## FUTURE

# Programming Language Trends Findings & Implications

---

## Findings

- Javascript is the most popular one
- SQL has a good place
- Bash/Shell/PowerShell is the last one
- C++, Java and Python is not in the list

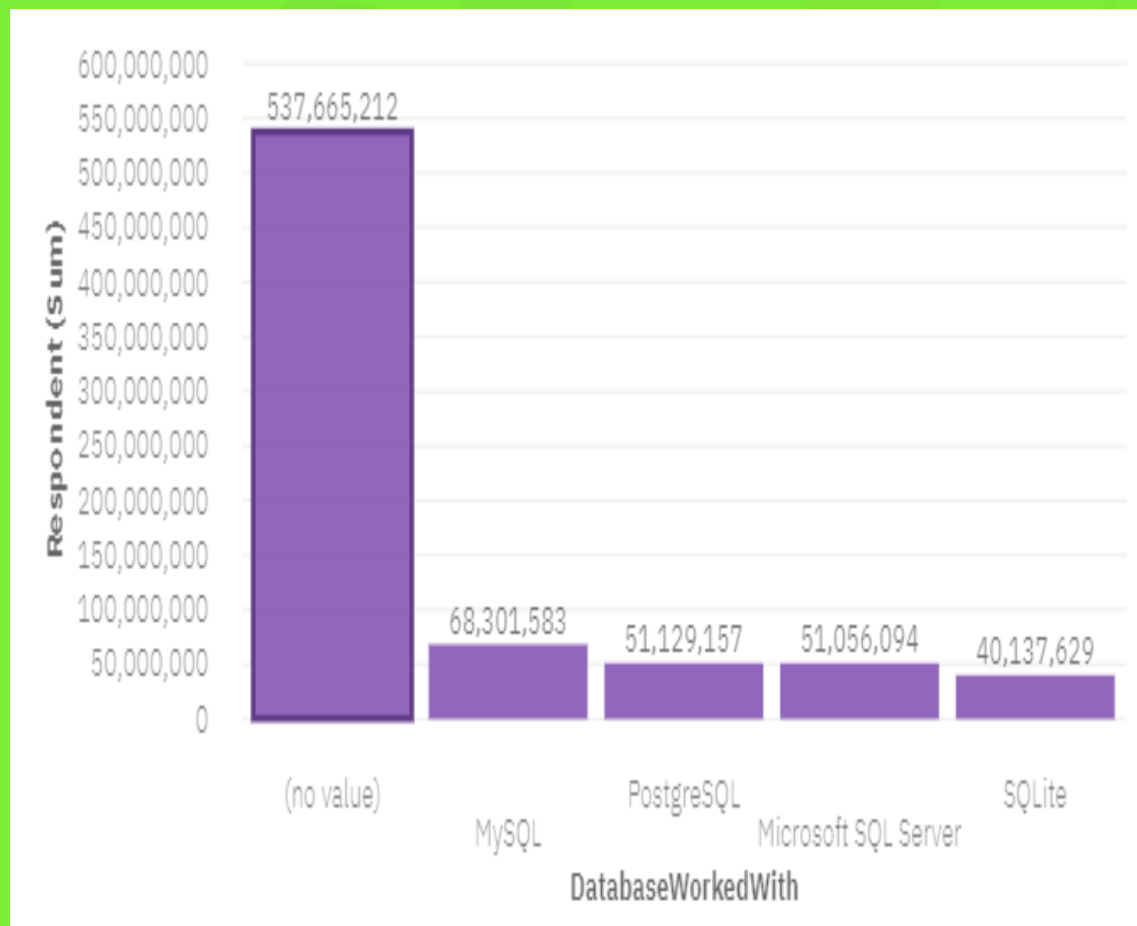

## Implications

- Python popularity will increase dramatically
- SQL is still in the table
- HTML/CSS is still in the list
- Bash/Shell/PowerShell lost its place

# Top 5 Databases

## CURRENT

## FUTURE

# Programming Database Trends Findings & Implications

---

## Findings

- SQL based ones cover the top 5
- MySQL is the top one
- PostgreSQL and Microsoft SQL Server has nearly same value
- SQLite is the last one

## Implications

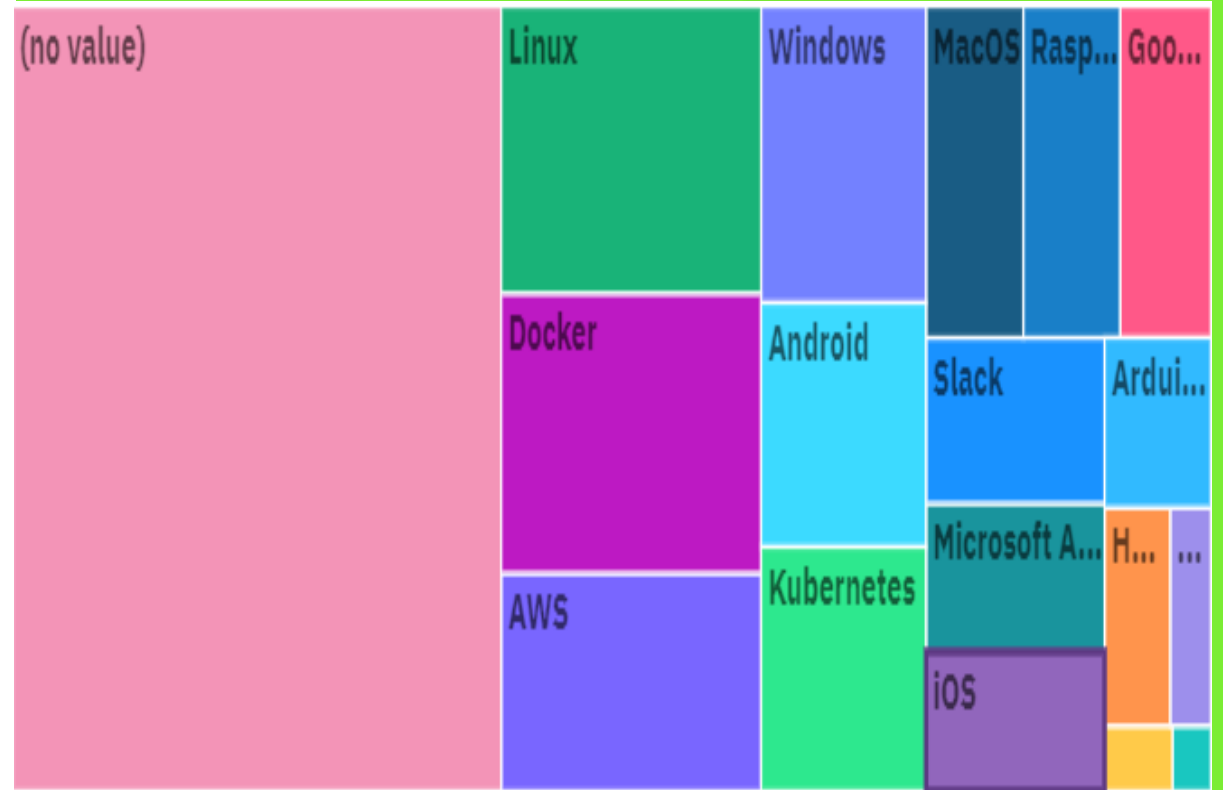

- New databases will come to the list and start to replace the SQLs
- MySQL is going to be the last one of the top 5
- MangoDB entered the list
- Redis entered the list

# Frames

## CURRENT

## FUTURE

# DASHBOARD

---

<https://eu-gb.dataplatform.cloud.ibm.com/dashboards/9e2c8de7-ecec-4cfe-8798-5f82f2b55435/view/0137c31a028362e309b5eee407c829522e34710bb2bb8b57d4807b4908362297f36e1b98c8291d5c8f170260fabe115ec0>

The Print screend of the dashboards are below.

# DASHBOARD TAB 1

Top 10 Language Worked With

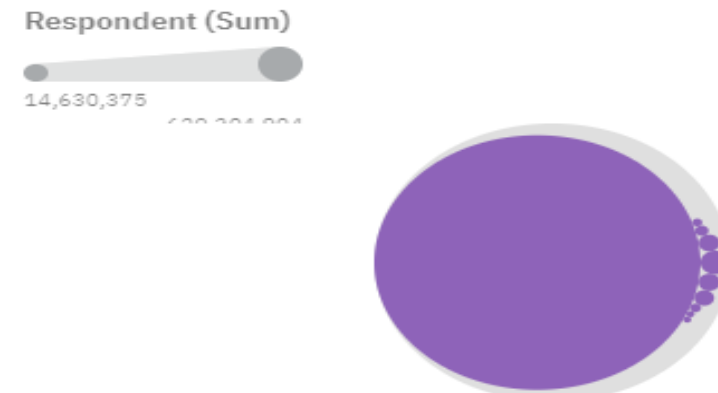

Top 10 Database Worked With

Platform Worked With

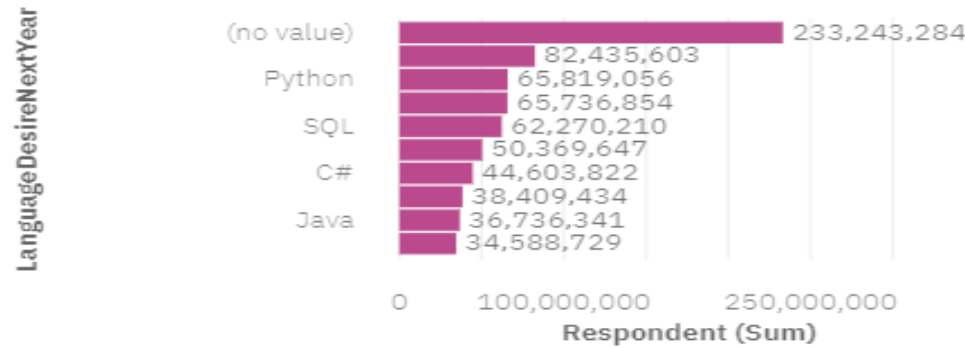

Top 10 Web Frame Worked With

# DASHBOARD TAB 2

## Top 10 Language Desire Next Year

## Top 10 Language Desire Next Year

## Platform Desire Next Year

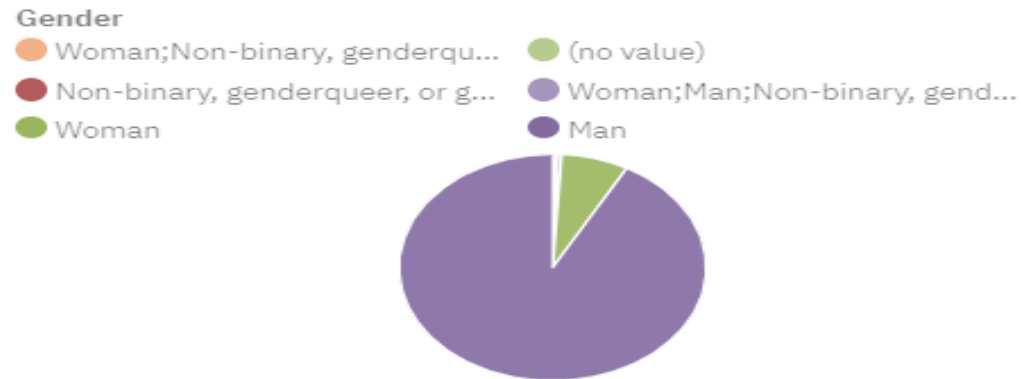

## Top 10 Web Frame Desire Next Year

# DASHBOARD TAB 3

Respondent classified by Gender

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

# DISCUSSION

In future Python is going to be more favorable

Script languages will be mostly used ones

NoSQL database impacts are increasing

Women are going to have more interest in being a data analyst

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- Programming languages changing rapidly
- Top 5 results may differ any time
- Python usage will increase in the future

## Implications

- SQL is going to use its popularity
- NoSQL ones will gain more interest
- these changes will have impact

# CONCLUSION

---

- Platforms are changing
- Cope with the change
- Dramatic changes have huge impacts

# APPENDIX

---

- GitHub Job Posting
- Popular Languages

# GITHUB JOB POSTINGS
